

MindNote

User guide

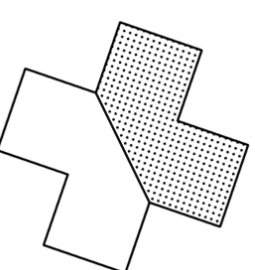

1. Home Page

The first page the user will see is the Home page. It contains a short description of the application. There are also two buttons - login and register, which after pressing will redirect to the login and register page respectively.

2. Navbar

Navbar layout changes depending on whether the user is logged in or not. Before logging in, there will be only two buttons: MindNote (Home) and Login button. After login, new buttons will appear, such as dropdown button for Notes and Collections, Friends, Notes and Logout button (it will substitute the Login Button)

Navbar before login:

Navbar after login:

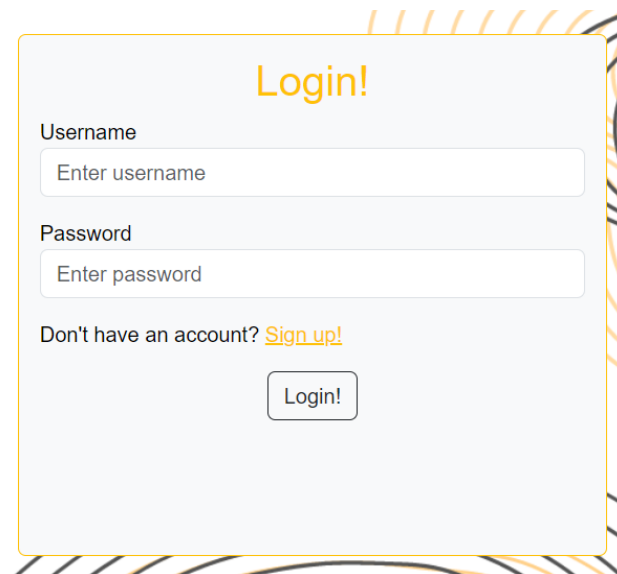

3. Login

To login, the user has to provide an username and a password of the already existing account. If those requirements weren't met, the error message will be shown.

If a user doesn't have an account, they can follow a link to the SignUp page.

Login form:

A screenshot of the login form. The form is a light gray box with a yellow border. At the top, it says "Login!". Below that, there are two input fields: "Username" and "Password". The "Username" field has a placeholder text "Enter username". The "Password" field has a placeholder text "Enter password". Below the input fields, there is a link that says "Don't have an account? [Sign up!](#)". At the bottom of the form, there is a "Login!" button. The background of the page features a decorative pattern of wavy lines in orange and black.

4. Register

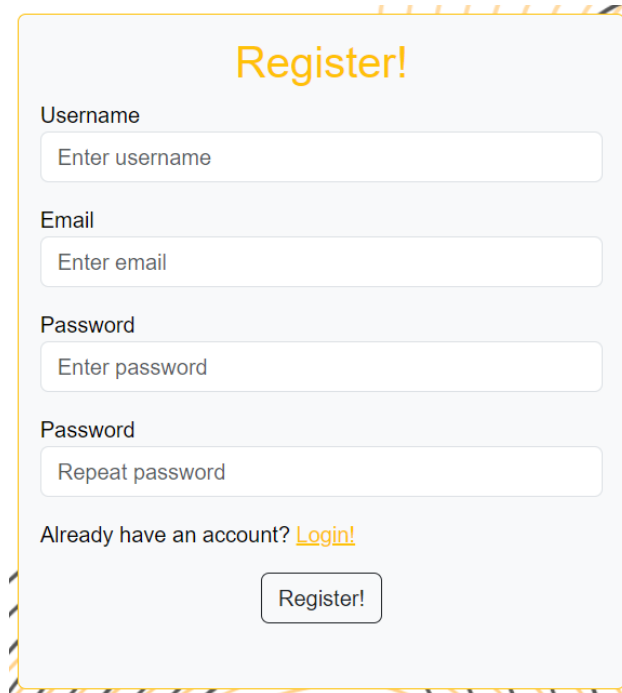

To register, the user has to provide the values for username, email address, password and repeat password.

- field cannot be empty
- username and email address have to be unique
- the email address has to follow this template: name@domain, e.g. simple@example.com

- password and repeat password must be the same
- password must contain at least 5 characters

If a user wants to login instead, they can follow a Login link.

5. Notes

On the notes page the user can access their notes.

Clicking the Create Note button will redirect to the Add Note page.

There are also three buttons for showing the user's notes, notes shared with a user and notes which current user is sharing.

Create Note

Your notes Notes shared with you Notes you are sharing

Note 1
 Note 1 description

Note 2
 Note 2 description

Note 3
 Note 3 description

Each note has three buttons: Details, Delete Note and Share Note. After pressing the first one, it is possible to see more information about the given note, as well as change its details. Clicking Delete Note will permanently remove a given note from the user's notes list. When clicking the Share Note pop up window is displayed, where the user sees a list of friends with whom they share that note as well as a list of friends with whom they can share notes.

1. Edit note:

Stop sharing note with:

☐ example user 1

Share note with:

☐ example user 2

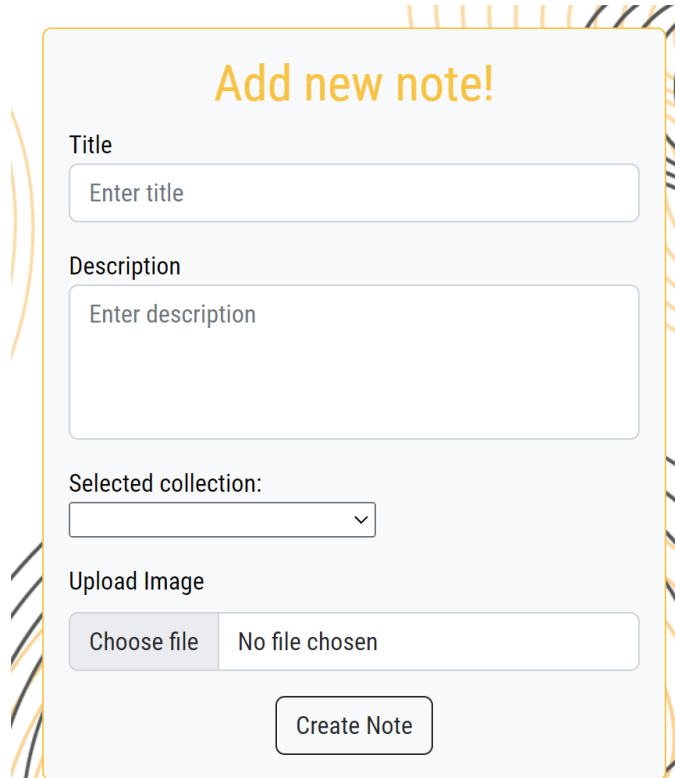

☐ example user 3

Close Share

6. Add Note

To create a new note, it is mandatory to provide a title and description. The note will be created with the default image and added to the user's notes list.

Add Note page:

A form titled "Add new note!" in orange text. It contains a "Title" section with a text input field labeled "Enter title". Below that is a "Description" section with a larger text input field labeled "Enter description". Underneath is a "Selected collection:" label followed by a dropdown menu. The next section is "Upload Image", which includes a "Choose file" button and a text field showing "No file chosen". At the bottom right is a "Create Note" button. The form is decorated with orange and black wavy lines on the left and right sides.

Create Note

7. Collections

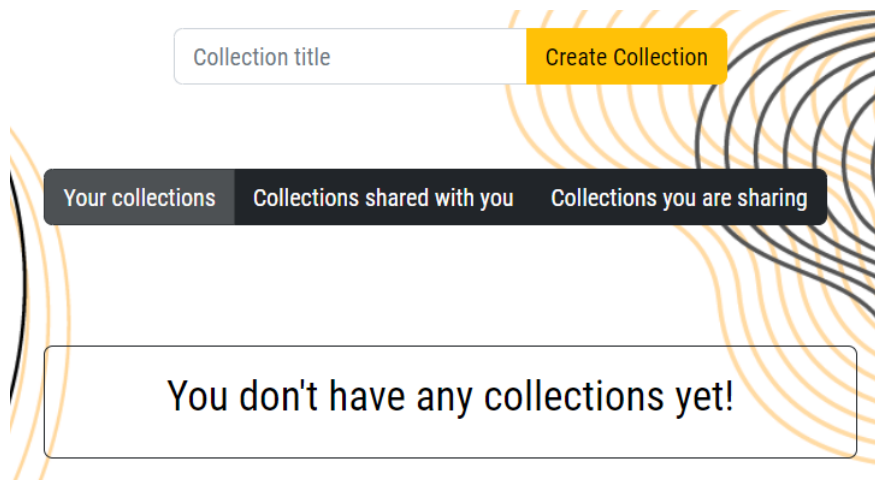

On the collections page the user can access their collections, as well as create a new one.

For creating a new collection it is necessary to provide the collection's name (which can't be empty) and then click the Create Collection button.

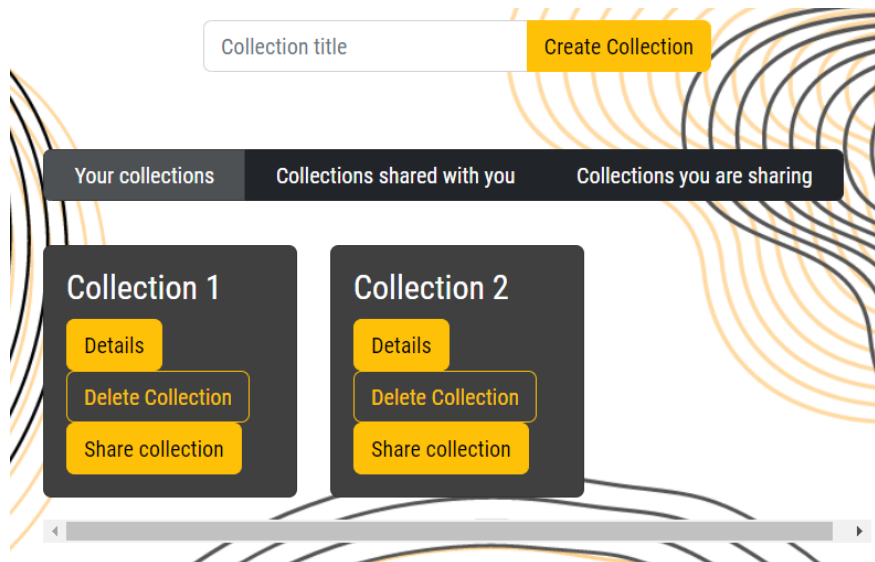

Just as with the Notes page, there are three buttons for showing the user's notes, notes shared with a user and notes which the current user is sharing.

Collections page when user doesn't have any collections:

Collections page after creating collections:

Each collection has three buttons: Details, Delete Collection and Share Collection . After pressing the first one, it is possible to see all notes that are in the given collection. Clicking Delete Collection will permanently remove a given collection from the user's collections list. When clicking the Share Collection pop up window is displayed, where the user sees a list of friends with whom they share that collection as well as a list of friends with whom they can share collections.

1. Details

Collection page if a given collection doesn't contain any notes.

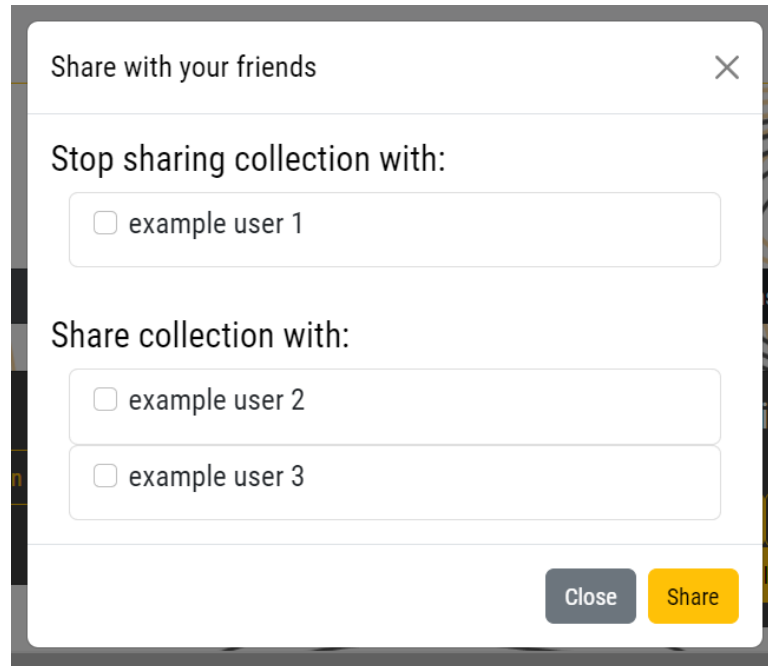

Collection page after adding notes.

It is possible to remove notes from a given collection.

2. Share collection

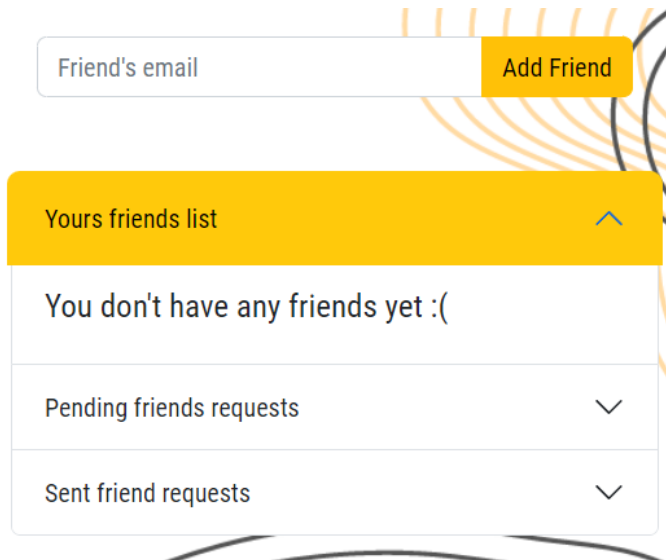

A dialog box titled "Share with your friends" with a close button (X) in the top right corner. It contains two sections: "Stop sharing collection with:" and "Share collection with:". The first section has a single input field with a checkbox and the text "example user 1". The second section has two input fields, each with a checkbox and the text "example user 2" and "example user 3" respectively. At the bottom right, there are two buttons: "Close" (grey) and "Share" (yellow).

8. Friends

On the friends page users can send friend requests, as well as manage their friendships.

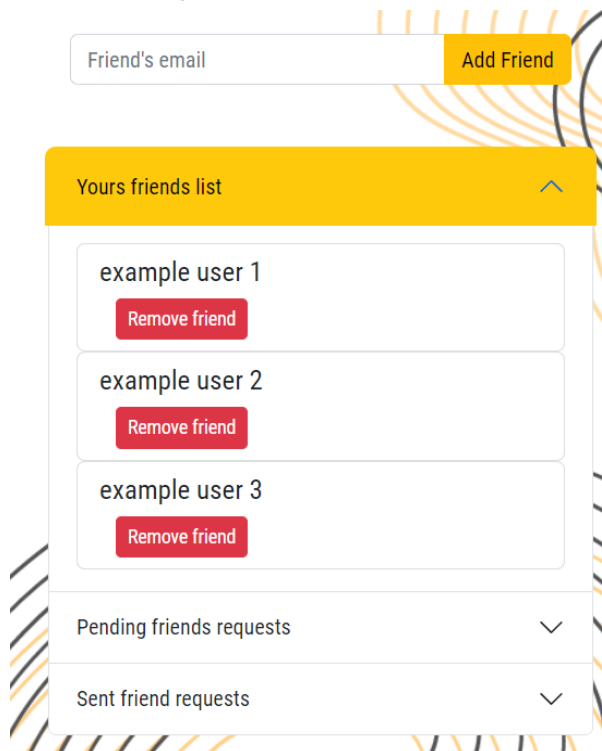

1. Friends list

Friends list if user doesn't have any friends:

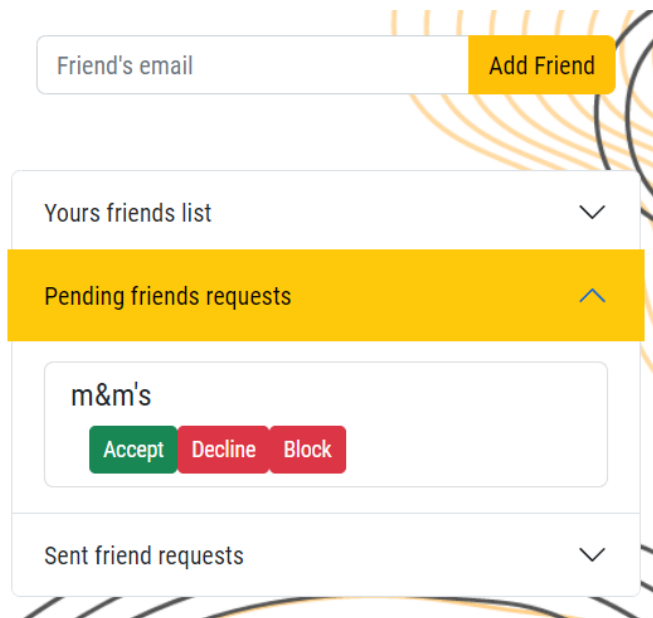

A form for adding a friend and viewing the friends list. At the top, there is a text input field labeled "Friend's email" and a yellow "Add Friend" button. Below this is a yellow header bar labeled "Yours friends list" with a blue upward arrow icon. The main content area shows the message "You don't have any friends yet :(" followed by two expandable sections: "Pending friends requests" and "Sent friend requests", each with a downward arrow icon.

Friends list after accepting friends invitation:

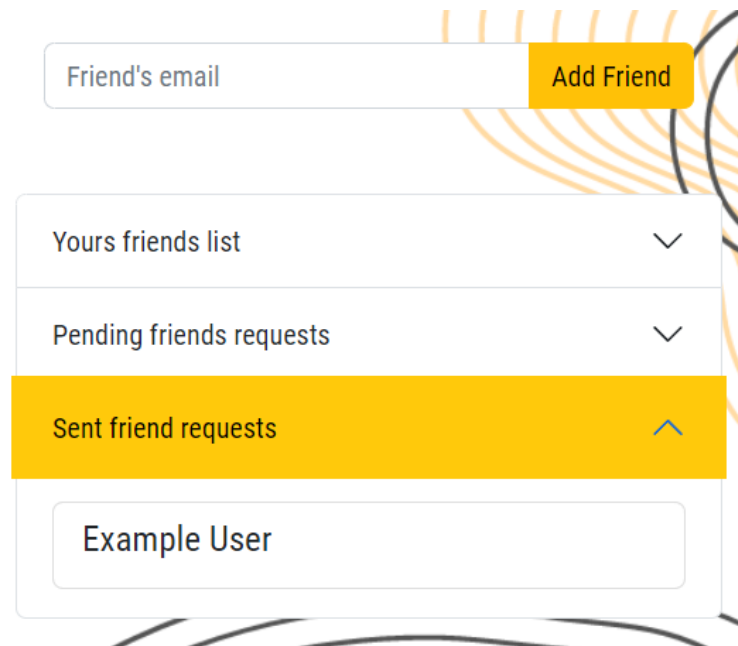

2. Pending friends requests

Here user can accept, decline or block friend requests. After blocking a user, the person sending the invitation will not be able to do it again.

3. Sent friends requests

Friend's email [Add Friend](#)
